THERE IS NO CLASS OF FLOWERS so much prized as those which are produced from bulbs. Closely following the disappearance of snow and long before ordinary outdoor flowers are in bloom, we may have, in their perfection, the hardy Crocus; then the fragrant and stately Hyacinth; a little later the varied and brilliant Tulips. These give an air of distinction and refinement to any lawn or garden, affording much pleasure to all who pass by.

WHEN TO PLANT

We would particularly emphasize the fact that fall and not spring is the time to plant all kinds of flowering bulbs. The bulbs should be planted as soon after September as possible, so that the roots will make good growth before the cold weather sets in. They may be set out from then until the ground becomes frozen. They require a moderately rich soil. When the ground freezes hard, the bed should be covered with three or four inches of leaves or dry litter. Too easy and heavy covering starts the tops prematurely. In the spring the covering should be carefully removed.

Our “Rainbow” Collection of Hyacinths

An increasing number of this collection is sold each year, which is proof of its popularity.

For Bedding Out in the Fall, or for House Culture in Pots and Boxes. Superb Mixture and Color.

In this collection of twenty bulbs we have chosen one each of the most distinct colors of this beautiful flower; this will give a grand effect when massed in a bed, and will show all the colors in striking contrast. PLANT HYACINTH BULBS SIX INCHES APART EACH WAY.
By Order of the United States Horticultural Board, the importation of Narcissus bulbs, in all varieties, is now prohibited—and as but a limited number are grown in this country and at very high prices, we are omitting them from this catalog.

We are making especially low prices on other bulbs to induce the planting of them in place of the Narcissus. Hyacinths, Tulips and other Fall bulbs will arrive from Europe in September.

NAMED DUTCH HYACINTHS
LARGE, PERFECT BULBS OF FINEST QUALITY

We have endeavored to get the very best in quality from best Holland growers. We import direct from the best known growers and customers may be assured that no better bulbs are to be had for the price asked.

For winter and early spring flowering nothing surpasses the Hyacinth. It is sure to bloom and give satisfaction in the house during the winter or in the garden in early spring. Its large spikes resemble nothing else in cultivation. Rather than offer a long, confusing list of varieties, we have carefully selected a list of Singles and Doubles, embracing all the shades of this beautiful flower, each one being the largest, strongest and best of its color. Plant Hyacinth bulbs 4 inches deep.

Extra Fine Single Dutch Hyacinths

This list contains such only as are real beauties, and a few varieties, which are not entirely new, but to which we wish to draw your special attention. **Price, 20c each, six for $1.00, postpaid.**

ARENITINE ARENDESEN
Snow-white. The spike is unusually well filled and has a perfect round shape. The broad, wide open petals are of intense whiteness and make the flower look unusually bright and pretty.

BUFF BEAUTY
Buff orange-yellow, long narrow spike on strong stem. A very peculiar color.

GENERAL DE WET
Light pink. Splendid for bedding as well as for forcing. The medium sized bells are of a lively light pink color with a lighter center and form a big, loose spike.

LADY DERBY
Bright rose-pink. It is rapidly becoming the leading pink pot hyacinth owing to its lovely shade of pink, its perfect spike on a strong stem and its splendid forcing qualities.

MYOSOTIS (Forget-Me-Not)
Beautiful blue, the only variety of this shade, large, strong spikes. Early flowering.

PERLE BRILLIANT
Light blue, tinged lavender. Produces an enormous spike of perfect shape and a big, smooth bulb. One of the best of the latest blue varieties.

Eight Best Named Single Hyacinths

We consider the Single Hyacinths more useful and valuable than the double varieties. They are better for forcing, more vigorous in growth, and produce stronger spikes of bloom; which are generally of better substance.

**Price, 17 cents each, or the Full Set of Eight for $1.30 postpaid.**

Late or May-Flowering Cottage Garden Tulips

Coming into bloom two or three weeks later than the early flowering types, and extending the Tulip season over a period of four weeks or more. On account of their extreme hardiness, they are specially adapted for the permanent hardy flower border, where they should be liberally planted in clumps or masses. They may also be naturalized in grass, wild gardens, etc. For bedding they are superb, while as cut flowers, having long stems with flowers of great substance, they stand in perfect condition for a long time. In planting, the bulbs should be set a little deeper than early Tulips, a covering of four inches being about right.

As they cannot be kept over, we must close them out at the end of the season, and offer them to our patrons in collections, strictly of our own selection.

Excellent for flower shows.

Mrs. Aaron Ward One of the most delightful Roses of recent years in a color that catches the eye at once. Coppery orange in the open bud, golden-orange when fully opened and red when fully open, it takes like a full fluffy-silk rosette.

Mrs. John Cook White suffused with delicate pink, describes the color of this strong-growing big-flowered beauty. The color varies with the season, the flush of pink being more pronounced during cold weather, while the Rose is almost white during the long days of bright sunshine. Bud is long and shapely, opens perfectly to a full double flower, petals of intense texture and substance. Blooms freely and is destined to take front rank among white Roses.

Red Letter Day An exceedingly beautiful Rose of infinite grace and charm. Its velvety, brilliant, glowing scarlet-crimson, and for open cactus-like flowers never fade, as the reflex of the petals is satiny crimson-scarlet.

Red Radiance It is not crimson but a bright, cheerful shade of red. In habit it is Radiance, pure and simple. It has the same characteristics of foliage and growth. Red Radiance will be a valuable acquisition.

Sunburst It has long, pointed buds. The color is orange-copper or golden-orange and is produced in clusters of petals lighter, extremely brilliant in effect. Belongs in the class of big Roses.

Wellesley Color is a beautiful shade of pink, the outside of the petals being bright and clear with a silvery reverse. It is a very vigorous healthy grower, carrying the flowers on long, stiff stems.

White Killarney It is a pure white in color, long in bud, of fine form. In fact it is equal to the best par excellence. It is also a great garden Rose, having more petals than its parent Killarney.

White La France It is identical with La France except in own roots and guaranteed true. Save money by buying direct from the grower.

ALPHONSE RICARD—An excellent semi-double, a strong grower, compact, free branching. Produces immense trusses of bloom; color bright orange-red.

BEAUTY POITEVINE—Semi-double. One of the very finest of the Brant race. The color is a brilliant salmon, shading to apricot in the center; trusses colossal, flowers two and one-fourth inches in diameter.

FRANCIS PERKINS—Color a bright pink. The blossoms are perfect in form and borne well and clear above the foliage.

HELEN MITCHELL—A semi-double of the clearest possible shade of scarlet, is early in bloom, and flowers very freely, during the entire season. Grows compact, medium dwarf with lustrous green foliage and throws up gigantic flower-heads very freely. It is a common occurrence that a single four-inch pot plant shows four fully open gigantic flower-heads, several half open and more in the earliness and constancy of bloom it surpasses all other Geraniums.

JEAN VIAUD—Of a beautiful clear rosy-pink color with distinct white blotch at the center. A rapid, vigorous grower, yet compact and shapely.

JEAN OBERLE—One of the most beautiful among that color known as the peach-pink; an excellent shade of hydrangea-pink shading tenderly to almost pure white at the outer edges of each petal; the florets are especially well formed, just semi-double enough to be pleasing; the trusses are actually immense often having over a hundred florets to the truss. Foliage distinct, and one of the type that stands the sun perfectly; color of foliage dark green, with a slight chocolate zone.

MRS. BUCKNER—A pure double white Geranium, as free-flowering as the single varieties; used for planting in beds for furnishing a supply of beautiful white flowers for vases, etc.

MISS FRANCES E. WILLARD—Is of vigorous growth; flower stalks very long and carried well above the foliage; color a delicate blush, shaded with pearl-pink, a most charming piece or shading.

RED WING—This is a fine American Geranium just offered for sale. It has all the marks of a successful bedder or pot plant being a healthy robust grower, large-flowered and extraordinarily floriferous. Color deep cardinal red with a soft velvety haster.

S. A. NUTT—This is the darkest and richest double Geranium grown. It is very bright, dark, deep, rich velvety maroon; an excellent bedder and a perfect pot plant.

Ever-Blooming PELARGONIUMS

Better Known as Lady Washington Geranium

THE GRANDEST OF ALL FLOWERING PLANTS

Do not resemble the common Geranium in any particular, neither in foliage nor flower; more beautiful in every way. We here offer five distinct sorts, every one entirely different in color and every one a beauty. The Lady Washington Geraniums are the foremost of all flowers—once seen, never forgotten.

PRICE, 25 CENTS EACH; 5 FOR $1.00; 10 FOR $1.90. (Plants from 2½-inch pots.)

EASTER GREETING—This species is the earliest of all Pelargoniums with enormous florets and clusters having light green foliage and of dwarf robust growth. It blooms from March until fall. The florets are of a fiery amaranth-red with five regular shaped spots. The first and only kind to bloom as well bedded out as in pots and to do so all summer. The only kind that stands bedding out in groups. It rivets the Azaleas in beauty as a pot plant for Easter, and when bedded out in summer will remain in bloom until frost in September.

GARDENER'S JOY—The ground color is apple-blossom pink, the upper petals have blotches of carbon brown, the florets are three and one-half inches in diameter and are joined to enormous clusters which rise above the beautiful foliage and remind one of a Rhododendron cluster. It is of a half dwarf nature and very sturdy. On account of its rapid luxuriant growth it is a very profitable market variety.

GLORY—This splendid novelty is quite remontant, florets and clusters are very large; ground color blue, very much like the Cattleya Orchid. The upper petals contain two large purple magenta-red spots, distinctly veined. An exceedingly beautiful and extremely new color in Pelargoniums. This kind has a very robust growth.

LUCY BECKER—This grand novelty is a sport of Easter Greeting, and is like it in everything but color, which is a rosy-pink. It is more early in bloom than anything else in bloom.

PRINCE—Immensely large flowers, strongly crimped, of fine shape, with from six to ten petals, color rich purple with velvety black blotches. Remarkably robust habit. The large clusters rise gracefully above the beautiful foliage. The blooming plant with its enormous flowers makes a striking impression.

Pansy Geranium Mrs. Layal

(The genuine "Pansy Geranium."). Rounded, satiny, exquisitely marked and colored, this variety is truly Pansy-flowered. Its color range from a large crimsoned chocolate center through pink to white at the edges.

Price, 25 cents; $2.50 per dozen.

Pelorargonium—Easter Greeting.
ARGENTEA GUTTATA

This variety is an introduction of M. Lemonie and is a cross between Olbia and Alba Picta. This beautiful sort has the silvery blottches of Alba Picta, the grace and beauty of growth of Olbia. It has purple-bronze leaves, oblong in shape, with silvery, markings, and is in every way a most beautiful Begonia. Produces white flowers in bunches on ends of growth stems. Good for house culture.

Alba Picta Long, pointed, slender leaves, thickly spotted with silvery-white. Foliage small and elegant.

Alba Perfecta Grandiflora We doubt if there is a white-flowered variety that equals it. The foliage resembles Rubra in shape, but it is lighter green, while the flower panicles are much handsomer. It is a pure white flowering Begonia of much merit.

Coraline Lucerne (The Wonderful Flowering Begonia.) This Begonia has simply taken everybody who has seen it by storm. It certainly is a wonder. The blooms last from a month to six weeks, and are borne in immense clusters almost hiding the plant. The color is bright coral red, changing to a delicate pink. It is past the power of speech to describe it. A wonder. Price, 25 cents each; 6 for $1.25.

Mrs. A. C. Townsend Belongs to the Ricinifolia family; leaves are a charming lustrous metallic-green color; an unusually profuse bloomer; flower of a delicate light pink, borne on long foot stalks.

Pink Rubra We doubt if there is a pink flowered variety that equals it. The foliage resembles Rubra in shape but is a lighter green, while the flower panicles are much handsomer. It is a pure pink flowering Begonia.

Thurstoni The under side of the leaves is a rich purplish-red, the veining very prominent, while the face or upper side is a bronzy-green, shaded with crimson and olive, with a peculiar glossy-metallic lustre over all. Flowers rosy-white, in large clusters well above the foliage. The plant has a fine habit.

Two Extra Fine Varieties of REX BEGONIAS

Chatellaine Supreme This Begonia is undoubtedly the freest blooming variety known. Is of easy culture, low bushy habit and literally covered the entire year with a wealth of bright pink flowers with yellow stamens. It well merits the name of Ever-Blooming Begonia. Fine plants from 3 inch pots, 30 cents each; 6 for $1.50.

Unnamed Rex Begonias

Nature has bestowed on Rex Begonias many of her choicest gifts, uniting the radiance and brilliancy of precious jewels, the shining lustre of metals, with the beautiful colors and textures of the most costly fabrics. The leaves alone possess all these charms, while the dainty flowers add lightness and grace. Give them a soil composed of rich loam, woods earth and sharp sand. They require a warm, moist atmosphere and a shady situation. Do not allow the sun to strike the leaves while wet, and do not over-water. Nothing can surpass them for the window or conservatory culture; they may be planted in a shady situation under trees or alongside of the house. Rex varieties make immense leaves. We can furnish Rex BEGONIAS in choicest sorts at 25 cents each, three for 65 cents; 12 for $2.50.

Argentea Guttata

Louise Closson

Louise Closson Purplish-tinted. One of the richest and most beautiful of the Rex family. The coloring is simply magnificent, center of leaf deep maroon with broad band of silvery rose, edged bronze, giving the whole leaf a purplish tint. The oddest color of all the Rex. Price, 25 cents each; 6 for $1.25.

Speculata Quite a novelty in the Rex type. Leaves are in the form of a grape leaf. Color is a bright green, with a background of chocolate; veins of a light peas-green, the whole leaf spotted with silver. In bloom it is magnificent; the panicles composed of great number of individual pink blooms, are lifted high and spray-like quite clear of foliage. Price, 25 cents each; 6 for $1.25.

Chatellaine Supreme

Rex Begonia
Superb French Hydrangeas

FINES VARIETIES

This species of Hydrangea is generally hardy in the South and throughout the Middle States with some protection during winter months, and here they will flower profusely from June to October. In our Northern States they will give better results when used as pot plants. The plants succeed rather better in a shady place than where it is too sunny, on which account they are valuable for house culture. The pot plants require a liberal supply of water during their season of growth and flowering.

Price, Young Plants 20 Cents Each; Four for 75 Cents

AVALANCHE—A splendid large white, which has made a reputation for itself during the past two seasons, an easy variety to force early, and remarkably free-flowering.

BOUQUET ROSE—Large trusses of well-formed flowers, rosy amber turning to bright pink; has proven a special favorite in the New York market this season.

LA LORRAINE—Very large flowers, pale rose turning to bright pink; has become a general favorite during the past two years.

MME. E. MOUILLERE—This has been the favorite white variety in the New York market this year, very free flowering, of good size and form. Awarded silver medal at the National Flower Show at Boston last year.

"Never Fails to Flower"

PURPLISH SCARLET BLOOMS

An early flowering variety, with long drooping flowers, borne in great profusion. Stems branching and hanging in bunches. It grows and blooms with the greatest ease, requires absolutely no care, living for months without water, increasing in value yearly. 30 cents each; 3 for 75 cents.

Culture of Cactus

The plants should always be kept more or less dry. However, it is well that the plants be given a light sprinkle once a week; they are able to go for a long period without any water at all and remain alive.

The Cacti may be planted either individually in pots or collectively in bowls.

When the plants are arranged in bowls without drains, the top level of the soil should be above the level of the bowl so that most of the water will run off. Enough will penetrate to moisten the soil. There should never be enough water at any time for the water to stand in the bottom of the bowls. This burns the soil.

May be ordered by number. Price, 50c each; 6 for $2.75.

The ordinary temperature of the living room suits them nicely, and their new growths will soon surprise you with their graceful beauty.

ANY OF THE FOLLOWING FERNS IN NICE YOUNG PLANTS, 20 CENTS EACH; 4 FOR 75 CENTS; STRONG FOUR-INCH POT PLANTS, 50 CENTS EACH; 4 FOR $1.05

THE "ROOSEVELT FERN"
(Nephrolepis Roosevelt)—In general characteristics it resembles the Boston Fern, but with two points of great excellence over that variety. First it produces many more fronds, making it a bushier and handsomer plant; then the pinnae are undulated, giving it a pronounced wavy effect seen in no other Fern. It is highly recommended.

THE POPULAR BOSTON SWORD FERN
(Nephrolepis Exaltata Bostoniensis)—In the vicinity of Boston no other plant is used so extensively as this graceful Nephrolepis, which differs from the ordinary Fern in having much longer fronds, which frequently attain a length of four feet. These fronds arch and droop over very gracefully, on account of which it is frequently called the Fountain Fern.

OSTRICH PLUME FERN
(Nephrolepis Whitmanii)—An improvement on the Nephrolepis Elegantissima, with still more gracefully divided pinnae, giving the whole plant an airy lace-like appearance; makes beautiful symmetrical plants even in small sizes and large specimen plants are beautiful beyond description.

NEPHROLEPIS SPARROWI

We take pleasure in offering to our customers this valuable variety, a true sport of the Neph. Superbissima (or Fluffy Ruffles) Fern. It has the dark green foliage of its parent, which, with its beautiful crested fronds, makes it a most unique, distinct and desirable Fern. One of the most distinguishable textures of this Fern is its robustness, which makes it a very rapid and easy grower; a Fern the amateur can grow with success. We recommend this variety most highly.

Innissfallen.

New Fern INNISFALLEN

This handsome new variety originated with us. It is of the Elegantissima type, a strong and rapid grower, handsome green foliage, and has a stiff midrib which makes the fronds stand up better than most varieties of Ferns. It has a distinctness of its own and is most desirable in all respects. Price, young plants, 25 cents each; large plants, 50 cents each.

Dwarf Growing FERNS for Dishes

We have grown a large quantity of small Ferns suitable for Fern dishes. The use of ferneries as ornaments for the dinner table is now very general. Nothing makes so fine an ornament, or is so well adapted for the purpose.

PRICE, 12 CENTS EACH; SIX FOR 60 CENTS; $1.10 PER DOZEN.

Crytomium Falcatum (Holly Fern.) We consider this one of the finest Ferns in cultivation to grow into specimen plants, and while it is coarser than the Tremula Fern, it is very graceful and is becoming very popular. The leaf is a rich, glossy green, an each leaflet is about the shape and size of a Rose leaf. The fronds are fine for cutting on account of their lasting quality.

Pteris Wilsoni An ornamental Fern of unusual merit. One of the most dwarf of this class, having deep green foliage, leaves heavily crested, giving it the appearance of a tassel. A fine addition to the ornamental varieties.

Moss Fern (Selaginella Emilia)—An upright-growing moss with delicate lace-like foliage. Suitable for Fern dishes or for table and house decorations.

WATCHEM GROW PLANT FOOD

All plants, from a tiny blade of grass to a large tree will be benefited by drinking of this food. Price, 8 oz. can post paid for 50 cents—will make 25 gallons.

SPLENDID PEONIES 

"ARISTOCRATS OF THE FLOWERS"

Great, gorgeous blossoms, daintily dyed with the most exquisite shades, from white to the deepest reds. They are deliciously fragrant. Bloom several weeks in the spring. Height, 2 to 3 feet. Cultivate — They will grow anywhere, reasonably speaking — though they do best in rich, deep soil and a sunny position, but thrive well in partial shade. Plenty of water during the growing season is an added stimulus. They are perfectly hardy, require no protection, and are not troubled with insects or disease.

PLANT PEONIES IN FALL FOR BEST RESULTS.

**Felix Crousse** All Peony enthusiasts are familiar with the fact that it is difficult to get a red Peony that is a self color — that is, a full, rich, even shade of red without being suffused with a shade of another color. Felix Crousse fills the bill. A rich, even, brilliant ruby-red, exceptionally fiery, bright, effective; very large; full, bell-shaped bloom. We place this in the front rank of Red Peonies. Price, 70 cents each.

**HARDY OUTDOOR FERNS**

Just the thing for that shady place around your house where most flowers will not do so well. Plant these Ferns about 12 inches apart, the crown level with surface of ground, and give them a thorough soaking to settle the soil around the roots and a mulch to preserve moisture. The planting season runs from October 1st to June 1st. Fall planting gives the soil a chance to settle solid around the roots which will insure stronger growth the first year. Most Ferns do best in a light soil containing much vegetable matter, and it is always best to work a considerable amount of leaf mold into the soil of a fern bed. While few Ferns grow well in very dry soil, the common notion that they require very wet or almost swampy conditions is not well founded. Most of them, even those that grow naturally in very wet places, do nicely under ordinary garden treatment, in the matter of moisture. While the native Ferns are, of course, perfectly hardy, most of them are better off with a light covering of leaves in winter. In their natural habitat they are usually well covered with leaves and snow throughout the winter.

**We offer only the four most popular varieties.** One each of the four, postpaid, for $1.25.

**Hardy Maidenhair Fern** (Adiantum Pedatum.) Perhaps the most graceful of all; attains a height of 12 to 18 inches when well grown. Prefers a shady, moist, well drained shaded locations. Price, 35 cents each; 6 for $1.75.

Its vase like masses of foliage are dark green and is one of the tallest of our Ferns and should be planted well back. Price, 25 cents each; 6 for $1.25.

**Christmas Fern** This Fern, when grown under ideal conditions, attains a height of three feet, its peculiar grace and beauty makes it desirable in all fern gardens. Price, 35 cents each; 6 for $1.75.

**Interrupted Fern** (Osmunda Claytoniana.) A large Fern growing in a crown 2 to 3 feet high, 8 inches broad, clothed with rusty wool when young. Very beautiful, cinnamon colored leaves. Does well under cultivation in high, shady or open places. Price, 40 cents each; 6 for $2.00.
